CCT Medical

A close-up photograph of two hands clasped together in a firm, interlocking grip. The hands are light-skinned and appear to be of a professional age. The person on the left is wearing a light blue, textured business suit jacket. The person on the right is wearing a white dress shirt. The background is a soft-focus grey. A solid red rectangular box is overlaid on the right side of the image, containing the text "Trusted Partner..." in white, sans-serif font.

Trusted Partner...

Team Strength!

In the IT world, we passionately build unique projects.

Target and Capacity

Our continuity is driven by passion and commitment to enhance the wellbeing of human life.
Our strength emanates from a strong infrastructure and in-depth knowledge.
Our flexibility supports the local and global commercial relations.

Competitiveness and Sustainable Quality

CCT competitive advantages lie in:

- Our market strategy of exceeding expectations by creating a measurable Win for customers.
- Flexibility of application and business practice.
- Customization to each customer local regulations and international standards.
- Excellence in pre and post support.
- Fast market delivery and in due time.
- Sensitive market pricing.

Enterprise Sensitivity

Professionalism and information privacy are our codes of conduct; we adhere to the strictest rules and highest level of practice quality. We pride our work with continuous R&D; we adhere to local and international regulations and provide clients local service and global protection.

CCT realizes the scale of responsibility it assumes; thus, we utilize the power of more than 400 experts globally with rich, diverse skills & capabilities.

CCT Mission

Making life a little bit simpler through innovative IT solutions; creating real time verification, enhancing trust and authenticity, thus combating counterfeit and forgery.

CCT Vision

To be a global leading provider of innovative solutions in document security and counterfeit combat technology.

Our values

Customer Focus, Trust, Excellence, Sustainable Innovation, Social Responsibility, Pride.

R&D Philosophy

CCT driving forces are based on continuous feed of information, real-time and dynamic changes. We continuously adapt our system with customer needs. Our innovative team relentlessly synchronize our knowledge with changing surrounding environment.

Management and Staff

Our strength emanates from our pride in highly skilled and trained staff; each member represents CCT in its values and beliefs. In a collegial environment, management and staff complements each other with open communication; while management leads and serve, the technical team innovate and produce.

A close-up photograph of a clock face partially buried in a mound of fine, golden-brown sand. The clock is made of a dark, possibly metal, material with raised numbers. Only the numbers 6 through 12 are visible on the left side, and 1 through 5 on the right. A single, polished metal hour hand is visible, pointing towards the 12 o'clock position. The sand is piled up around the clock, creating a sense of being buried or hidden. A red rectangular box is overlaid on the right side of the image, containing the text "Trust, Solid Foundation...".

Trust, Solid Foundation...

Authentication Made Simple...

Our life is full of complexities, CCT simplify preservation, control, verification and authentication of our critical information and important documents in Real-time.

How simple is AC-QR system?

Two simple steps:
First, click on the Application on your phone; Two, Scan the AC-QR code on document... enjoy life simplicity!

How do AC-QR systems simplify complexities?

As soon as we realize the necessity to perform the simple steps to secure our information and documents; our daily life becomes simpler!

How does CCT system protect?

Verification and Authentication is performed online real-time, allowing the user to detect on the spot any changes, updates or falsification and forgery. Decisions can be made without delays.

Who can use the Application?

Anyone who has a smartphone connected to an internet and downloaded the AC-QR related applications – Free Apps Download – would be authorized to utilize the appropriate app based on local country rules and regulations.

With AC-QR all processes are under control

No change goes undetected... this is it!

Full Control...

The workflow scenario consists of 2 stages and four steps

Verification ... Online, Real-time!

AC-QR Products

All Documents Used in Any Sector

01 All kinds of Valuable Documents such as Financial Documents, Official Documents, Certificates, Reports, Animal ID Cards and Documents Used in the Armed Forces.

CCT Academy CCT Academy / Application iVerify-Certificate

02 Educational records verification and authentication online, real-time; such as College Certificates, Transcripts, Diplomas etc.

CCT Bank CCT-Bank / Application iVerify-Check

03 Checks verification, authentication and traceability system with statistical data system.

CCT Estate CCT-Estate /Application iVerify-Tapu

04 Real Estate documentation and land registry in need of preservation, verification and or authentication.

CCT Identity CCT Identity / Application iVerify-Identity

05 Critical official identification documents that needs protection from counterfeit fraud such as Passports, Personal IDs, Driver Licenses, Social Security documents, Permits, Brand Authentication, Animal Identification, Automobile plates, Art authentication, Artifact records and IDs, Museums records etc.

CCT Pharma CCT-Pharma / Application iVerify-Drug

06 Pharmaceutical identity, drug authentication and verification, statistical data system with supply chain management traceability and tractability.

CCT Medical CCT Medical / Application iVerify-Medi

07 Critical medical documents in need of preservation, verification and or authentication such as: Doctor prescriptions, Patient records, reports, or Hospital Equipment records etc.

CCT Business CCT Business / Application iVerify-Invoice

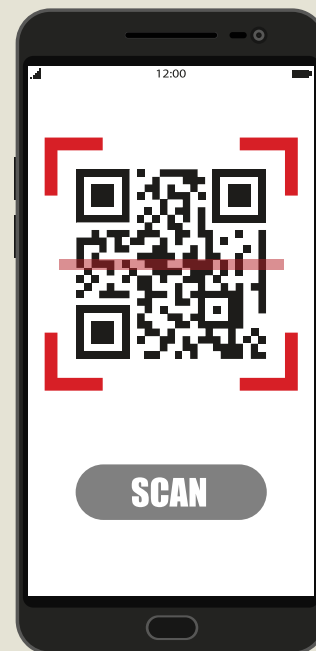

08 Critical business transactions documents in need of verification and or authentication such as: Monetary & Financial documents, Banking Transactions, Invoices, Bonds, Guarantee letters etc.

CCT eDocuments CCT e-Documents / Application iVerify-Document

09 Critical records and documents other than governmental IDs in need of protection, verification and or authentication, such as public notary, embassy documents, corporate & military communications etc.

AC-QR Simplicity into our lives!

- Document/Product preservation, Counterfeit and Forgery detection
- Trusted and inimitable...100% protection
- Verification and Authentication is simple and real-time
- Update with traceability and tractability
- Statistical Data Analysis
- Full Archiving system and ease of retrieval capabilities
- Making corporate life a bit simpler
- Improving document credibility to the highest level
- Decreasing Operational Costs and Improving Sustainability
- Improving Turn Around Time of activities
- Enhancing national economic sustainability by protecting products and documents
- Building high level of trustworthiness within processes improving high standard of interactions.
- Counterfeit Free Society

A conceptual image showing a human hand at the bottom, with fingers slightly curled, holding a glowing DNA double helix structure. The DNA is composed of small, light-blue spheres connected by thin lines, forming a classic twisted ladder shape. A bright, warm yellow light emanates from the base of the DNA where it meets the hand, creating a lens flare effect. The background is a solid, deep blue gradient. A semi-transparent red rectangular box is positioned in the upper right quadrant, containing white text.

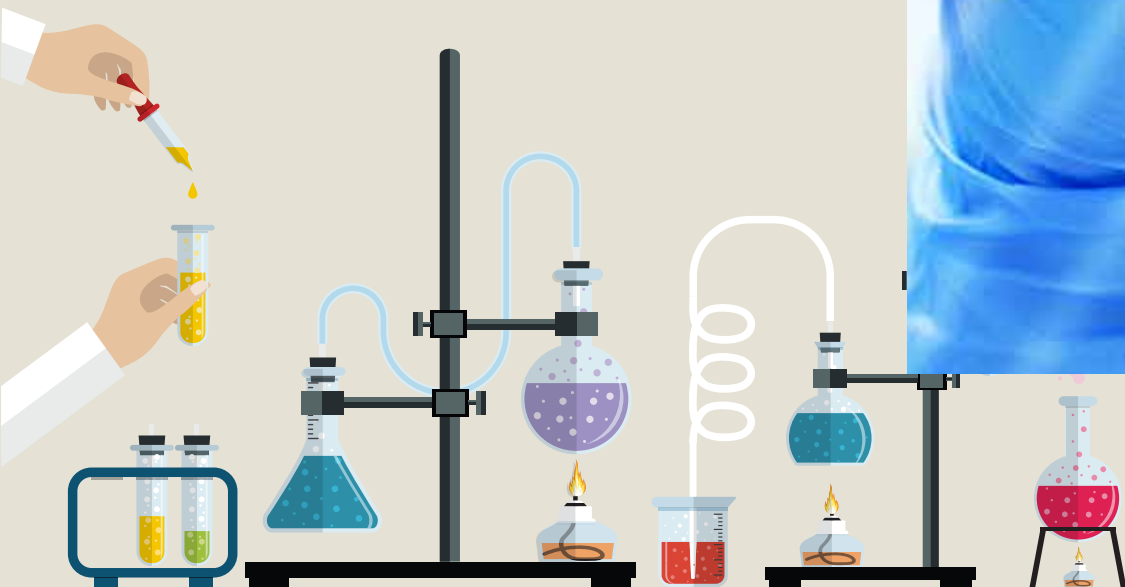

“DNA” a Unique Identifier

CCT System Development Philosophy!

How do we preserve documents and combat the problem of counterfeit?

A simple way to describe CCT system and its AC-QR is that the genetic system works in producing a very specific DNA code for each. The DNA, a detailed genetic information storage, is considered the only unique identifier as it is unique and any change in its components will result in a change in the outcome.

CCT system considers each document and product item; the system gives it at its creation a unique (or) stores its information. The code is unique and in addition, at any point of time a change occurs to the product it is detected by CCT system with real time check and authentication process, with the ability to authentic document changes.

A still life photograph featuring three vintage glass bottles and a key. On the left, a large, dark, rounded bottle with a black stopper stands next to a smaller, similar bottle. In front of them is a smaller, greenish bottle with a red cap and a label that partially reads 'REACH'. The bottles are set against a dark, textured background. To the right, a wooden shelf holds a single, ornate key. The foreground is covered with a rough, burlap-like fabric. The lighting is warm and directional, creating strong highlights and shadows.

Some things can never be imitated

What does CCT Medical do?

1- Protect medical documents from counterfeit or fraud; documents such as: Doctor prescriptions, Patient records or reports, Hospital equipment etc.

CCT system creates a unique AC-QR code labeled on the document in which all information are preserved as meta-data and pdf forms, easily and confidentially retrievable real-time online from protected servers or cloud system.

2- Traceability of these documents from its point of origin to every point of use real-time on-line from anywhere worldwide based on authorized access.

3- Tractability of any change over the age of the document after its initial production such as name change with verification and authentication process real-time online.

4- Full control and edibility of the document from owner without loss of history such as the ability to edit the information, temporary halt it or completely nullifying it.

5- Retrieval of document owner information and ability to update it online.

6- Verification of document's originating organization online real-time.

7- Highly secured archiving of database in computing cloud with real-time online retrieval.

8- Statistical data analysis for documents, its utilization and whereabouts.

How does CCT Medical work?

Two simple stages:

Stage 1 is document production with encoded information

Stage 2 is real-time online verification

Stage1: Production

CCT- Medical program uploaded on clients document production server, CCT-Medical gets to work behind the scene as client request document production, it automatically generates encoded AC-QR code with the programed information. Once the document is printed it securely uploads the original static information to client server/cloud with both meta-data and scan of the original document.

Stage 2: Retrieval & Verification

Anytime anywhere worldwide when needed to authenticate and verify encoded document, the end-user - per authorization level - will simply utilize CCT special iVerify application to scan the coded AC-QR document with instant online real-time results. Verification and Authentication are instant, with most updated changes if any.

iVerify-Med

All CCT iVerify apps are easily available on Apple stores, Google Play, Windows store for applicable Computers, Phones or tablets.

A close-up photograph of a doctor's torso. The doctor is wearing a white lab coat over a light blue shirt and a blue tie. A stethoscope is visible on the left side of the chest. The doctor's hands are holding a silver pen and a green clipboard. The doctor is looking down at the clipboard, which appears to contain a report. A red rectangular box is overlaid on the image, containing the text "... is it my report?".

... is it my report?

CCT Medical utilization benefits

- Document/Product preservation, Counterfeit and Forgery detection
- Trusted and inimitable...100% protection
- Verification and Authentication is simple and real-time
- Update with traceability and tractability
- Statistical Data Analysis
- Full Archiving system and ease of retrieval capabilities
- Making corporate life a bit simpler
- Improving document credibility to the highest level
- Decreasing Operational Costs and Improving Sustainability
- Improving Turn Around Time of activities
- Enhancing national economic sustainability by protecting products and documents
- Building trustworthiness within processes improving standards of interactions.
