

Created for those seeking
Authenticity...

New Generation QR Code

I have dreams, ideas and goals.

I stare towards the horizon with passion for discovery... To be great, I must be strong and persistence... My drive emanates from the mission... Building trust is my purpose...

There are always new ways to discover.

Team Strength!

With our brand we built in the IT world, we passionately achieve strong projects.

The Relation between Target and Capacity:

Who are we? Visionary professionals. Our continuity is driven by passion and commitment to enhance the wellbeing of human life. Our strength emanates from a strong infrastructure and in-depth knowledge. Our flexibility supports the local and global commercial relations.

Competitiveness and its relationship with Sustainable Quality Management:

Our competitive advantages lie in:

- Our market strategy of exceeding expectations by creating a measurable Win for customers.
- Flexibility of application and business practice.
- Customization to each customer local regulations and international standards.
- Excellence in pre and post support. Fast market delivery and in due time. Sensitive market pricing.

Enterprise Sensitivity:

Professionalism and information privacy are our codes of conduct; we adhere to the strictest rules and highest level of practice quality. We pride our work with continuous R&D; we work with local and international regulations and provide our clients local service and global protection. Based on its vision; CCT realizes the scale of responsibility it assumes; thus, we utilize the power of more than 400 experts globally which provides rich, diverse source of skills & capabilities.

CCT Mission

Making life a little bit simpler through innovative IT solutions; creating real time verification, enhancing trust and authenticity, thus combating counterfeit and forgery.

CCT Vision

To be a global leading provider of innovative solutions in document security and counterfeit combat technology.

Our values

Customer Focus, Trust, Excellence, Sustainable Innovation, Social Responsibility, Pride.

Our Research and Development Philosophy:

Our driving forces are based on continuous feed of information, real-time and dynamic changes. R&D is part of our everyday life. We continuously sync our knowledge with external customer needs. Our rich and diverse innovative resources are continuously synchronizing our systems with surrounding environment.

Management and Staff relations:

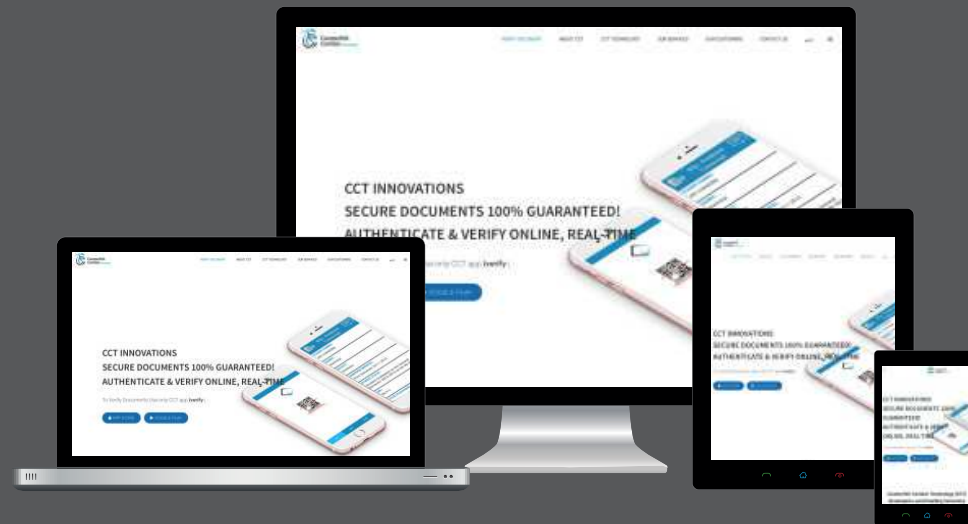

Our strength emanates from our pride in highly skilled and trained staff; each member represents CCT in its values and beliefs. In a collegial environment, management and staff complements each other with open communication; while management leads and serve, the technical team innovate and produce.

Created for those seeking Authenticity...

New Generation **QR Code**

Authentication Made Simple...

Our life is full of complexities, AC-QR is here to simplify in Real-time preservation, control, verification and authentication of our critical information and important documents.

Verification and Authentication is performed real-time online, allowing the user to detect on the spot any changes, updates or falsification and forgery. Decisions can be made without delays.

Counterfeit of documents and products are a global security and economic threat costing world economies billions of dollars annually, in addition to societal impact and health risk. Exhaustive efforts are spent to combat its effects. CCT objective is minimizing ways for counterfeit and simplifying - with 100% accuracy - the discovery of forgery in real-time.

How simple is AC-QR system?

Two simple steps:
First, click on the Application on your phone; Two, Scan the AC-QR code on document... enjoy life simplicity!

How do AC-QR systems simplify complexities?

As soon as we realize the necessity to perform the simple steps to secure our information and documents; our daily life becomes simpler!

Who can use the Application?

Anyone who has a smartphone connected to an internet and downloaded the AC-QR related applications – Free Apps Download – would be authorized to utilize the appropriate app based on local country rules and regulations.

With AC-QR all processes are under control

No change goes undetected... this is it!

DOCUMENTS COUNTERFEIT EXPOSURE ONLINE, REAL-TIME!

AC  **QR**
New Generation QR Code

Why Counterfeit Combat Technology?

CCT and iVerify are innovative patent methods to secure documents and enable instant verification process with 100% effectiveness from anywhere worldwide. Traceability, Tractability and Control by the issuing institute are few additional measures; thus, preventing document forgery and introducing seamless authentication that is accurate, secure and efficient.

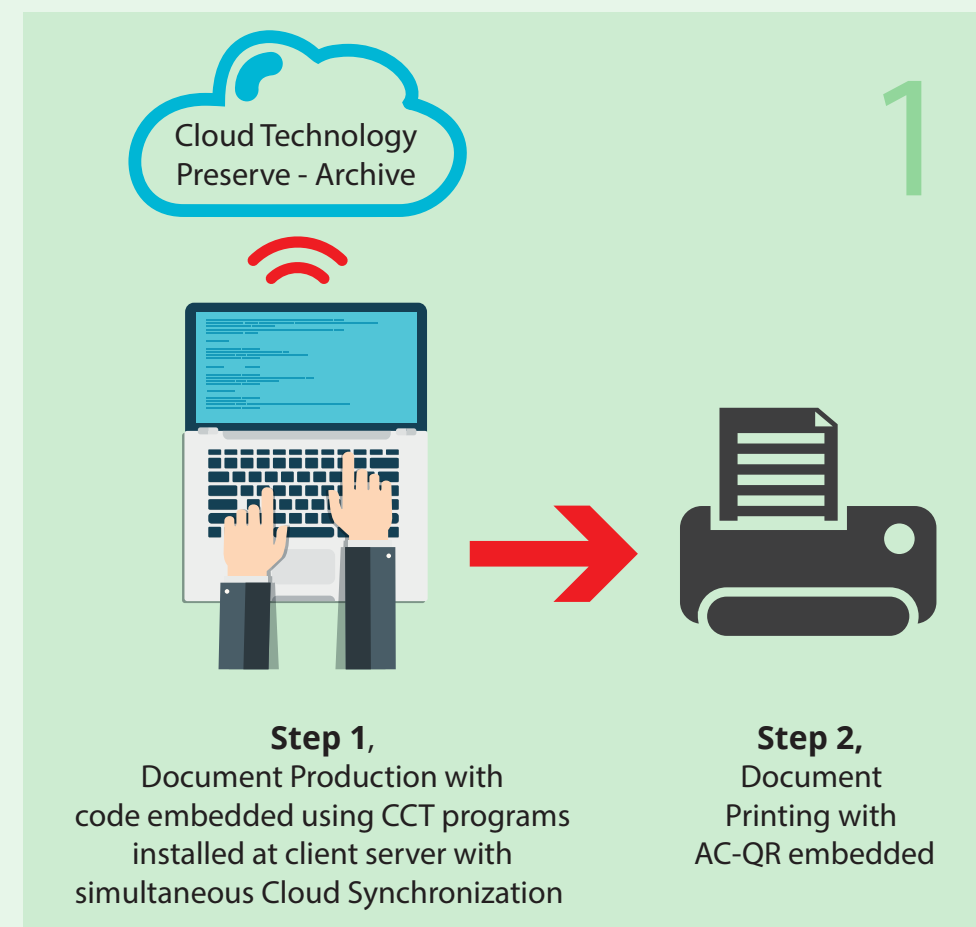

Why CCT inc.?

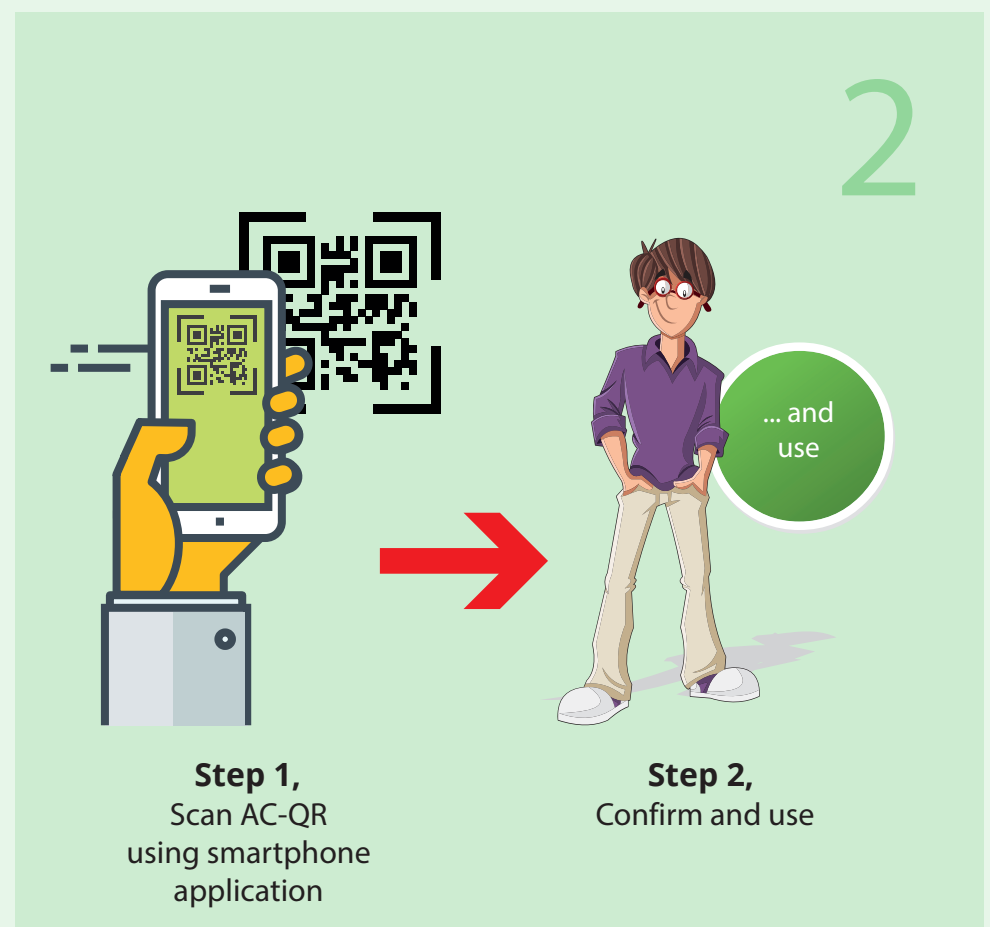

How does CCT system work?

The workflow scenario consists of 2 stages and four steps

Stage One

Stage 2, Verification and Authentication

Why AC-QR?

AC-QR utilizes the most advanced barcoding systems, RFID, Block-chain technology, telecommunications, and cloud computing to secure documents and or products, enabling real-time verification and authentication to combat forgery and counterfeit. The system enables Traceability, Tractability and Control by the issuing institute.

Where can AC-QR be used effectively?

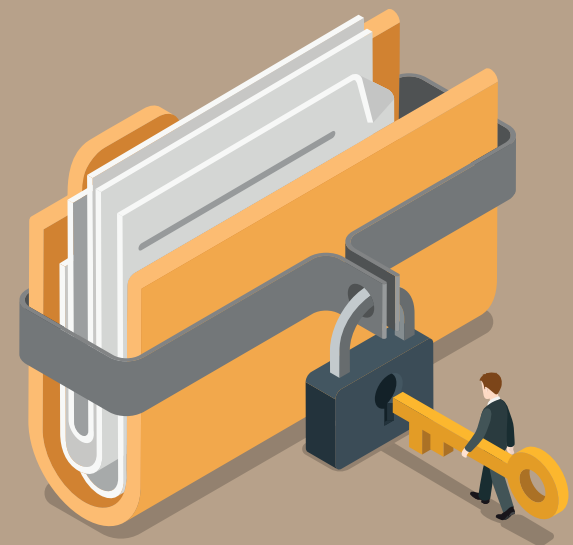

1. Financial Documents
 - 1.1 Checks
 - 1.2 Letter of Guarantee
 - 1.3 Bonds
 - 1.4 Invoices
 - 1.5 Any Monetary Document
2. Official Documents
 - 2.1 Land Registry
 - 2.2 Notary Documents
 - 2.3 Embassy Documents
 - 2.4 Identification documents (Passports, IDs, etc.)
 - 2.5 Licenses & Certificates (Driving, Birth, Marriage or divorce Certificates etc.)
3. Reports and Recognitions
 - 3.1 College Diploma, Transcripts and Certificates
 - 3.2 FDA reports and certificates
 - 3.3 Pharmaceutical Certifications & Packaging
4. Animal IDs & Certifications
5. All Official and Critical Documents
6. Military Documents & Equipment
 - 6.1 Written Requests Traceability
 - 6.2 Transportation of Fir Arms and Dangerous Goods
7. Healthcare uses
 - 7.1 Controlled Medication

AC-QR ... Simplicity into our lives!

- Document/Product preservation, Counterfeit and Forgery detection
- Trusted and inimitable...100% protection
- Verification and Authentication is simple and real-time
- Document Updatability
- Statistical Data Analysis
- Full Archiving system and ease of retrieval capabilities
- Making corporate life a bit simpler
- Improving document credibility to the highest level
- Decreasing Operational Costs and Improving Sustainability
- Improving Turn Around Time of activities
- Enhancing national economic sustainability by protecting products and documents
- Building high level of trustworthiness within processes improving high standard of interactions.
- Counterfeit Free Society

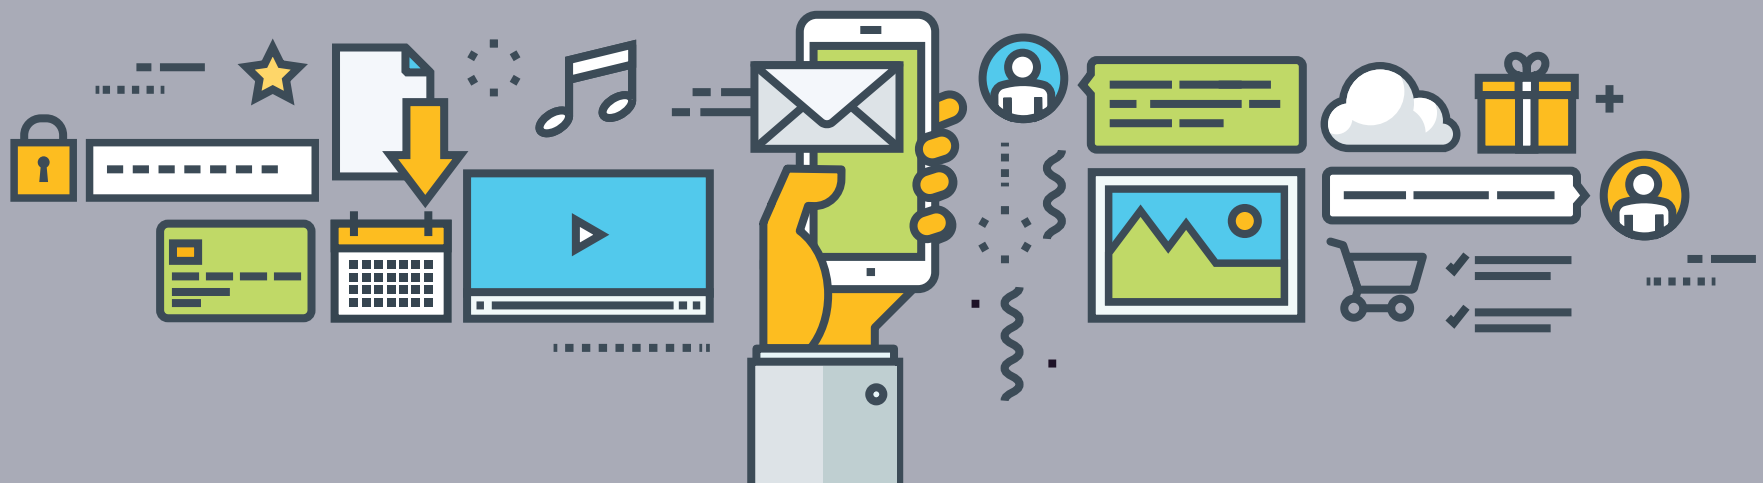

**Counterfeit
Combat**
Technology

Scenario #1

AC-QR utilization on checks or bank bonds makes fraud or counterfeit activities detectable real-time with 100% accuracy, traceability and tractability.

AC-QR in Financial Bonds

It is simply in two stages: Production & Confirmation

1

Production by initiator

Fill in the necessary information on the financial bond as usual

No: TL: KR: Borçlu: Vade: Tarih: Ödeme Günü: Türk Lirası: No: İşbu emre muharrer senedim mukabilinde tarihinde Bay yukarıda yazılı yalnız T. Lirası ödeyeceği Bedeli ahz olunmuştur. İşbu bona vadesinde ödenmediği takdirde müteakip bonolarında muacceliyet kesebedeğini, ihtilaf vukuunda mahkemelerin selahiyetini şimdiden kabul eyleri Ödeyecek: İsim Adresi KEFİL Ver. Da. No:

2

Production by initiator

Using CCT app (iVerify) on your smartphone or computer scan the AC-QR code on the bond and follow prompts.

3

Confirmation by end-user

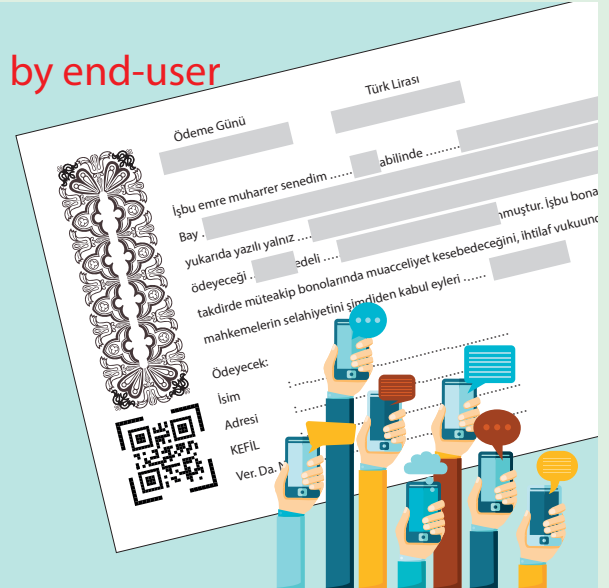

Scan the AC-QR on the presented financial bond for verification and authentication

4

Confirmation by end-user

Compare the paper bond to the information retrieved-Accept / Decline

Detecting falsified documents online real-time

A

AC-QR Scan for verification

Using a smartphone or computer read the AC-QR code on the document

B

Confirm Information

Compare information on the document with the extracted information on the system
Information did not match...
Document is not verified.

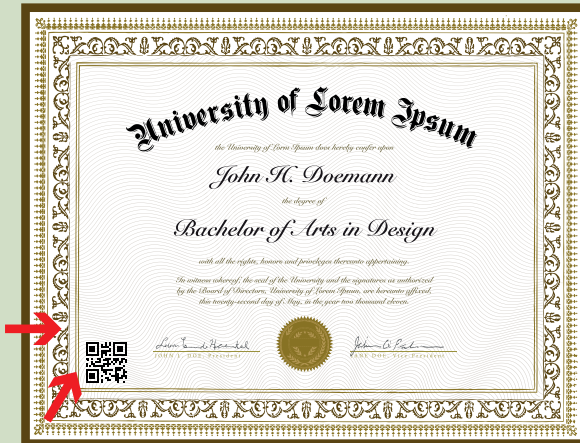

AC-QR in College Certificates

It is simply in two stages: Production & Confirmation

1 Production by initiator

Fill in the necessary information on the financial bond as usual

2 Production by initiator

Using CCT app (iVerify) on your smartphone or computer scan the AC-QR code on the bond and follow prompts.

3 Confirmation by end-user

Scan the AC-QR on the presented college certificate for verification and authentication

4 Confirmation by end-user

Compare the certificate to the information retrieved – Accept / Decline

Detecting falsified certificate real-time online

A AC-QR Scan for verification

Using a smartphone or computer read the AC-QR code on the certificate

B Confirmation

Compare information on the certificate with the retrieved information
Information did not match... **Certificate is not verified.**

Malicious Documents?

Falsified college certificates, forged IDs, passports, fake arts and artifacts or counterfeit drugs, fake pharma products etc. are all considered to be malicious documents that can inflict direct harm on peoples' lives or negatively impact the society and the economy.

AC-QR Platform is the first of its type that provide unparalleled security

Guaranteed comprehensive protection from malicious documents

Counterfeit detection online real-time 100% accuracy

What is the Solution?

Counterfeit Combat Technology (AC-QR coding system) proved to be most effective and efficient.

AC-QR Utilization Brief

Comprehensive overview of CCT systems

CCT system is based on three simple stages

Stage 1, Document initial production with embedded unique AC-QR code

Stage 2, CCT system uploads and synchronize all information on clients' server for ease of access and retrieval.

Stage 3, Confirmation

By utilizing CCT free downloadable apps and with proper level of authorization simple scan of the code would result with immediate real-time online verification and authentication of the document.

If there were any changes, or counterfeit activities it is detected with 100% accuracy. It is that simple!

Why counterfeit detection system?

Document and or product counterfeit activities is considered a major concern for countries and societies due to the amount of direct harm on people or economic losses for countries and companies.

Counterfeit & Economic Losses Annually in \$USD

- >1 million lives lost and \$200 Billion due to Counterfeit in Drug Industry.
- >\$100 Billion due to Counterfeit in Banking Industry.
- >\$100 Billion due to Counterfeit in Insurance Sector.
- >\$500 Millions due to Counterfeit, Fake University Degrees.
- >40,000 Fake Ph.D. Degrees in the US annually.
- >10,000 Fake Medical Doctors in the US.
- >200,000 fake degrees in the Middle East.

Types of Counterfeit Detection:

Fixed Non-Variable forgery such as organization's name, address, signature, stamp etc.☒

Dynamic Variable forgery such as personal name, ID number, address, college, specialty, grades, birthdate, expiration dates etc.

Server Stored Information forgery. Our system discovers and detects forgery made simultaneously to the document and to the data stored.

CCT with its patented innovative technology is making life a little bit simpler by building trust and authenticity in processes minimizing ways for counterfeit and simplifying its detection with 100% accuracy in real-time.

The best way to provide
Counterfeit Free Society
