CCT Academy

Trusted Partner...

Team Strength!

In the IT world, we passionately build unique projects.

Target and Capacity

Our continuity is driven by passion and commitment to enhance the wellbeing of human life.
Our strength emanates from a strong infrastructure and in-depth knowledge.
Our flexibility supports the local and global commercial relations.

Competitiveness and Sustainable Quality

CCT competitive advantages lie in:

- Our market strategy of exceeding expectations by creating a measurable Win for customers.
- Flexibility of application and business practice.
- Customization to each customer local regulations and international standards.
- Excellence in pre and post support.
- Fast market delivery and in due time.
- Sensitive market pricing.

Enterprise Sensitivity

Professionalism and information privacy are our codes of conduct; we adhere to the strictest rules and highest level of practice quality. We pride our work with continuous R&D; we adhere to local and international regulations and provide clients local service and global protection.

CCT realizes the scale of responsibility it assumes; thus, we utilize the power of more than 400 experts globally with rich, diverse skills & capabilities.

CCT Mission

Making life a little bit simpler through innovative IT solutions; creating real time verification, enhancing trust and authenticity, thus combating counterfeit and forgery.

CCT Vision

To be a global leading provider of innovative solutions in document security and counterfeit combat technology.

Our values

Customer Focus, Trust, Excellence, Sustainable Innovation, Social Responsibility, Pride.

R&D Philosophy

CCT driving forces are based on continuous feed of information, real-time and dynamic changes. We continuously adapt our system with customer needs. Our innovative team relentlessly synchronize our knowledge with changing surrounding environment.

Management and Staff

Our strength emanates from our pride in highly skilled and trained staff; each member represents CCT in its values and beliefs. In a collegial environment, management and staff complements each other with open communication; while management leads and serve, the technical team innovate and produce.

Trust, Solid Foundation...

Authentication Made Simple...

Our life is full of complexities, CCT simplify preservation, control, verification and authentication of our critical information and important documents in Real-time.

How simple is AC-QR system?

Two simple steps:
First, click on the Application on your phone; Two, Scan the AC-QR code on document... enjoy life simplicity!

How do AC-QR systems simplify complexities?

As soon as we realize the necessity to perform the simple steps to secure our information and documents; our daily life becomes simpler!

How does CCT system protect?

Verification and Authentication is performed online real-time, allowing the user to detect on the spot any changes, updates or falsification and forgery. Decisions can be made without delays.

Who can use the Application?

Anyone who has a smartphone connected to an internet and downloaded the AC-QR related applications – Free Apps Download – would be authorized to utilize the appropriate app based on local country rules and regulations.

With AC-QR all processes are under control

No change goes undetected... this is it!

Full Control...

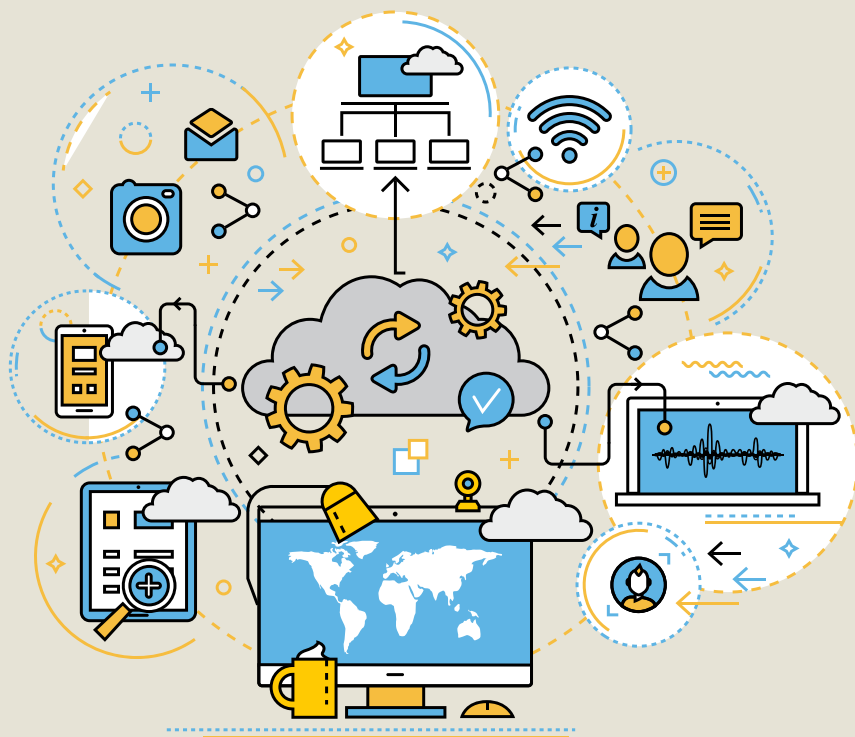

Why Counterfeit Combat Technology?

Why CCT inc.?

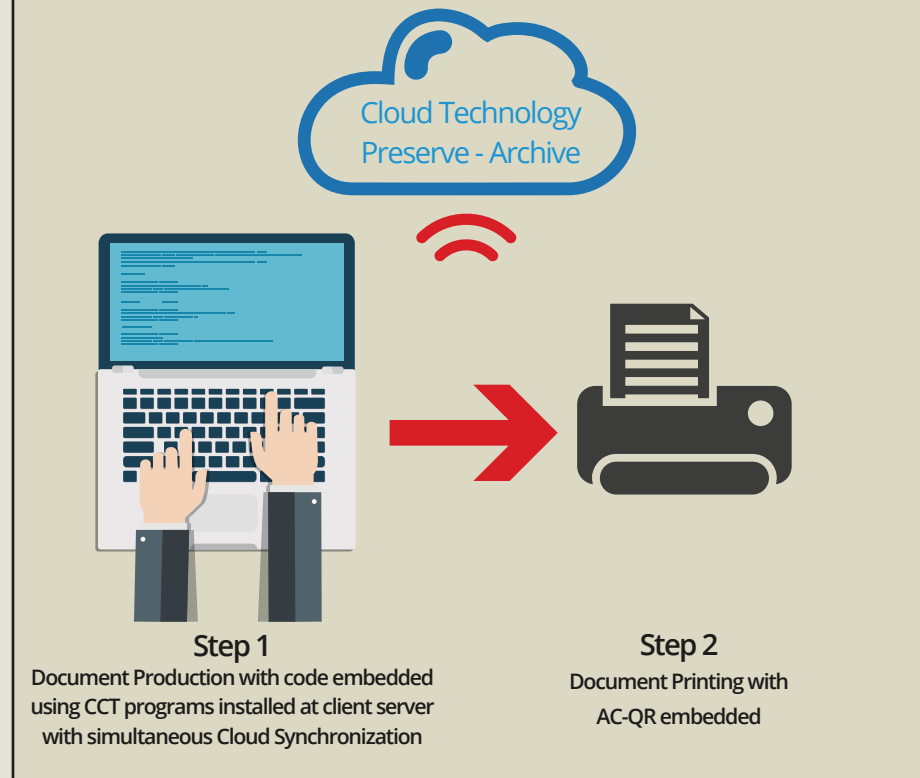

CCT and iVerify are innovative patent methods to secure documents and enable instant verification process with 100% effectiveness from anywhere worldwide. Traceability, Tractability and Control by the issuing institute are few additional measures; thus, preventing document forgery and introducing seamless authentication that is accurate, secure and efficient.

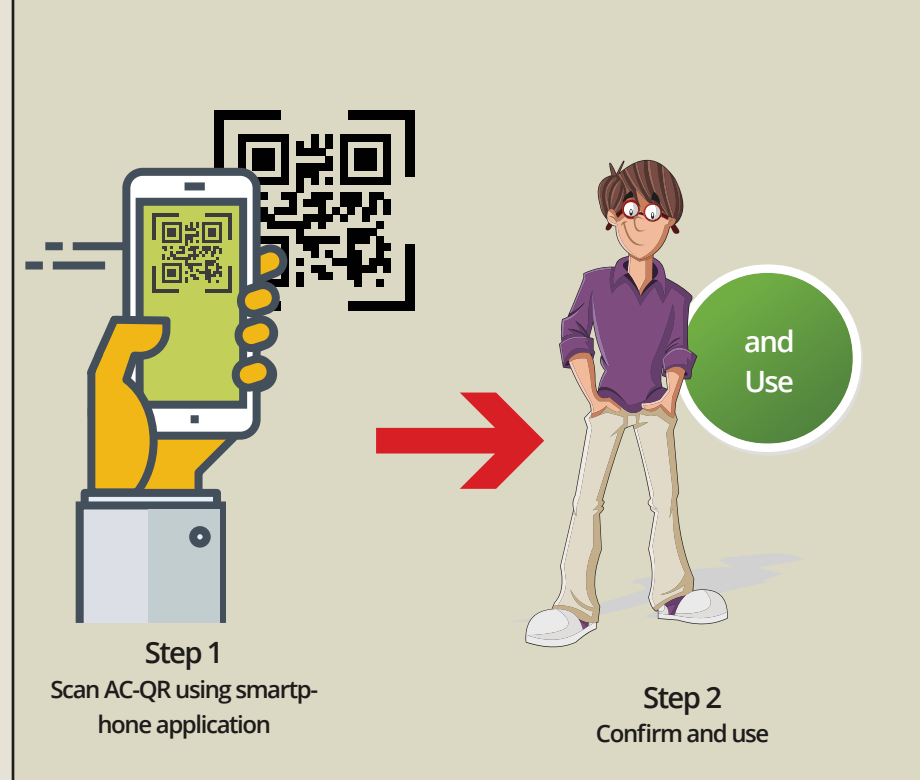

How does CCT system work?

The workflow scenario consists of 2 stages and four steps

1. Stage One, Creation & Production

Stage 2, Verification and Authentication

Verification ... Online, Real-time!

AC-QR Products

All Documents Used in Any Sector

01 All kinds of Valuable Documents such as Financial Documents, Official Documents, Certificates, Reports, Animal ID Cards and Documents Used in the Armed Forces.

CCT Academy CCT Academy / Application iVerify-Certificate

02 Educational records verification and authentication online, real-time; such as College Certificates, Transcripts, Diplomas etc.

CCT Bank CCT-Bank / Application iVerify-Check

03 Checks verification, authentication and traceability system with statistical data system.

CCT Estate CCT-Estate /Application iVerify-Tapu

04 Real Estate documentation and land registry in need of preservation, verification and or authentication.

CCT Identity CCT Identity / Application iVerify-Identity

05 Critical official identification documents that needs protection from counterfeit fraud such as Passports, Personal IDs, Driver Licenses, Social Security documents, Permits, Brand Authentication, Animal Identification, Automobile plates, Art authentication, Artifact records and IDs, Museums records etc.

CCT Pharma CCT-Pharma / Application iVerify-Drug

06 Pharmaceutical identity, drug authentication and verification, statistical data system with supply chain management traceability and tractability.

CCT Medical CCT Medical / Application iVerify-Medi

07 Critical medical documents in need of preservation, verification and or authentication such as: Doctor prescriptions, Patient records, reports, or Hospital Equipment records etc.

CCT Business CCT Business / Application iVerify-Invoice

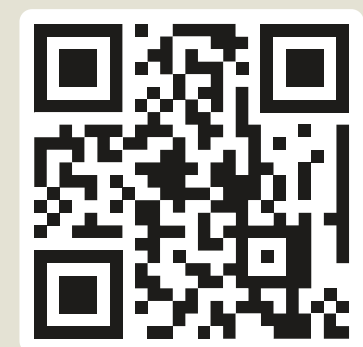

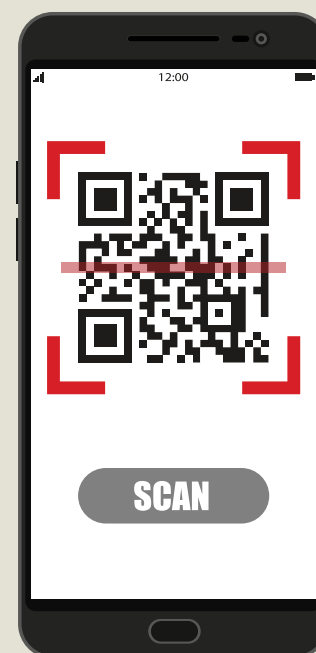

08 Critical business transactions documents in need of verification and or authentication such as: Monetary & Financial documents, Banking Transactions, Invoices, Bonds, Guarantee letters etc.

CCT eDocuments CCT e-Documents / Application iVerify-Documents

09 Critical records and documents other than governmental IDs in need of protection, verification and or authentication, such as public notary, embassy documents, corporate & military communications etc.

AC-QR Simplicity into our lives!

- Document/Product preservation, Counterfeit and Forgery detection
- Trusted and inimitable...100% protection
- Verification and Authentication is simple and real-time
- Update with traceability and tractability
- Statistical Data Analysis
- Full Archiving system and ease of retrieval capabilities
- Making corporate life a bit simpler
- Improving document credibility to the highest level
- Decreasing Operational Costs and Improving Sustainability
- Improving Turn Around Time of activities
- Enhancing national economic sustainability by protecting products and documents
- Building high level of trustworthiness within processes improving high standard of interactions.
- Counterfeit Free Society

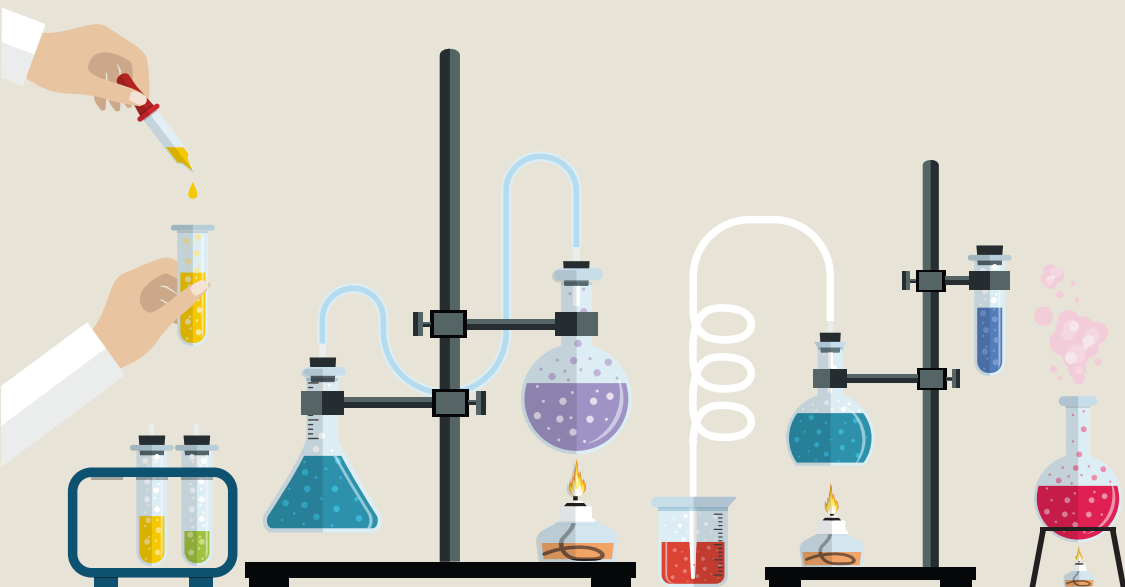

“DNA” a Unique Identifier

CCT System Development Philosophy!

How do we preserve documents and combat the possibility of its counterfeit?

A simple way to describe CCT system and its AC-QR product is by how the genetic system works in producing a very specific and unique DNA code for each. The DNA, a detailed genetic information map and storage, is considered the only unique identifier as it is not replicated and any change in its components will result in a clearly indicated change in the outcome.

CCT system considers each document and product an individual item; the system gives it at its creation a unique (AC-QR) code that stores its information. The code is unique and not replicable; in addition, at any point of time a change occurs to the document or product it is detected by CCT system with real time online verification and authentication process, with the ability to trace and track authentic document changes.

The image features a person wearing a dark hoodie, positioned in the center-right. Their right hand is raised, palm facing forward, with fingers slightly spread. The background is a dark blue-grey color, overlaid with a dense, light blue grid of numbers, resembling a digital or data theme. A semi-transparent red rectangular box is placed over the upper part of the person's torso, containing the text "Some things can never be imitated" in white. The overall aesthetic is modern and tech-oriented.

Some things can never be imitated

What does CCT Academy do?

1- Protect Academic documents from counterfeit or fraud;
documents such as: diplomas, certificates, transcripts, attendance
forms, certificate of enrollment etc.

CCT system creates a unique AC-QR code labeled on the document in which all information are preserved as meta-data and pdf forms, easily and confidentially retrievable real-time online from protected servers or cloud system.

2- Traceability of these documents from its point of origin to every point of use real-time on-line from any where worldwide based on authorized access.

3- Tractability of any change over the age of the document after its initial production such as a change of title owner name with verification and authentication process real-time online.

4- Full control and edibility of the document from owner without loss of history such as the ability to edit the information, temporary halt it or completely nullifying it.

5- Retrieval of document owner information and ability to update it online real-time.

6- Verification of document's originating organization online real-time.

7- Highly secured archiving of database in computing cloud with real-time online retrieval.

8- Statistical data analysis for documents, its utilization and whereabouts.

How does CCT Academy work?

Two simple stages:

Stage 1 is document production with encoded information

Stage 2 is real-time online verification

Stage1: Production

CCT Academy program uploaded on clients document production server, CCT Academy works behind the scene as client request document production, it automatically generates encoded AC-QR code with the programed information. Once the document is printed it securely uploads the original static information to client server/cloud with both meta-data and scan of the original document.

Stage 2: Retrieval & Verification

Anytime anywhere worldwide when needed to authenticate and verify encoded document, the end-user - per authorization level - will simply utilize CCT special iVerify application to scan the coded AC-QR document with instant online real-time results. Verification and Authentication are instant, with most updated changes if any.

All CCT iVerify apps are easily available on Apple stores, Google Play, Windows store for applicable Computers, Phones or tablets.

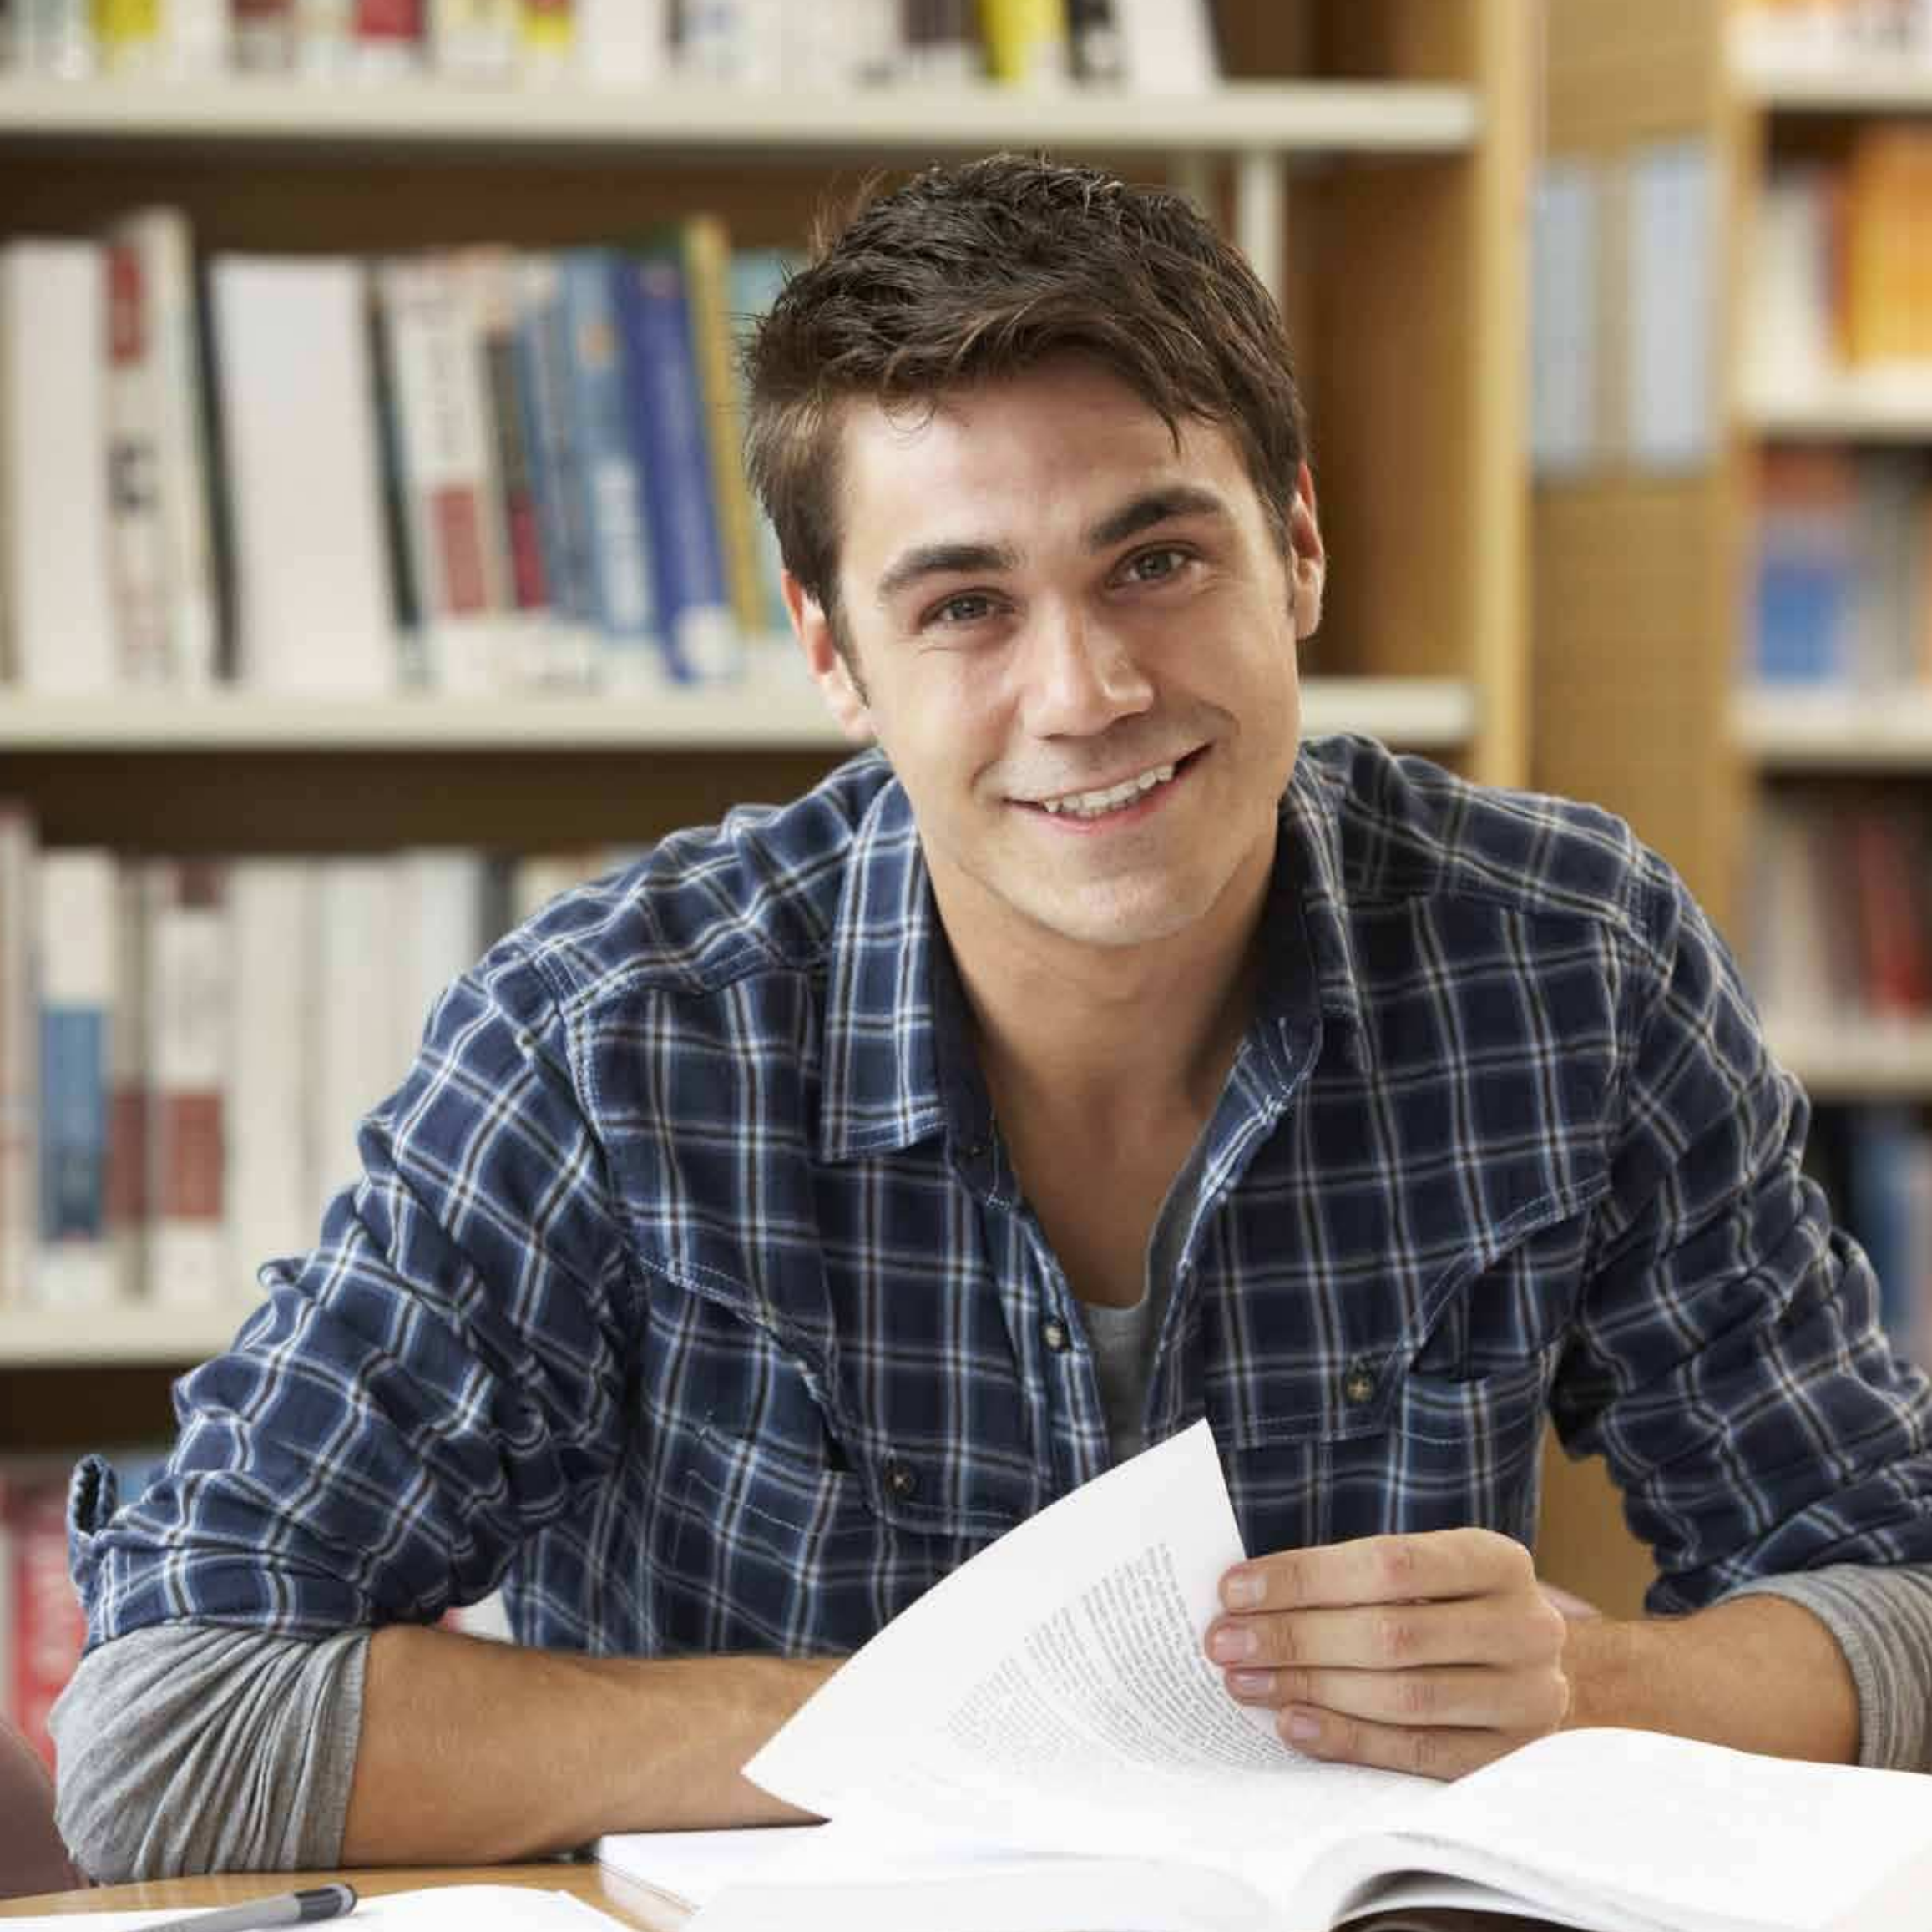

A close-up photograph of a person's hand holding a rolled-up white document. The document is secured with a vibrant red ribbon tied in a bow. The hand is positioned in the center, with fingers gently gripping the roll. The background is dark and out of focus, featuring a blurred yellow circular object. A semi-transparent red rectangular box is overlaid on the right side of the image, containing white text.

Your Success... Protect it

CCT Academy Utilization Benefits

- Document/Product preservation, Counterfeit and Forgery detection
- Trusted and inimitable...100% protection
- Verification and Authentication is simple and real-time
- Update with traceability and tractability
- Statistical Data Analysis
- Full Archiving system and ease of retrieval capabilities
- Making corporate life a bit simpler
- Improving document credibility to the highest level
- Decreasing Operational Costs and Improving Sustainability
- Improving Turn Around Time of activities
- Enhancing national economic sustainability by protecting products and documents
- Building trustworthiness within processes improving standards of interactions.
